HFMT Hamburg Harvestehuder Weg 12 20148 Hamburg

This manual will show you how to setup and use eduroam.

Members and students of the HfMT Hamburg can get access to the wifi through eduroam while being at the HfMT or at any host university using their HfMT username. The prerequisite is that the host university is a member of the eduroam network. Guests of the HfMT Hamburg also have access to the wifi through eduroam, if they have an account of a participating organization.

For authentication you need your HfMT login data (HfMT username and myHfMT-Portal password).

More information about eduroam and a list of all members of the eduroam network: <https://www.eduroam.org/>.

1. Accept the Terms of Use

If you already use the HfMT wifi you can skip this step and follow with step two.

In your browser, go to: <https://my.hfmt-hamburg.de/>.

You can either use your mobile data for this or the network „**HfMT Wlan Hilfe**“.

Login with your HfMT username and password, if you don't have a password yet or you forgot it, click on „Passwort vergessen“, and follow the instructions to get a new password.

Anleitung	
Schritt 1	Tragen Sie Ihre HfMT-Kennung (oder alternativ Ihre hinterlegte Email-Adresse) ein.
Schritt 2	Sie erhalten kurz darauf eine Email mit einem speziellem Link. Öffnen Sie diesen Link im Browser.
Schritt 3	Geben Sie die per SMS empfangene PIN ein.
Schritt 4	Geben Sie Ihr neues Passwort zweimal ein.
Hinweise	Sollte eine falsche Email-Adresse / Handynummer hinterlegt sein, dann kommen Sie bitte (mit Ausweis) in das IT Service Center. Sollten Sie das Passwortrücksetzverfahren mehrfach gestartet haben, so ist immer die letzte Email / SMS gültig.

When you are logged in, click on „WLAN“ at the far left, then read and accept the Terms of Use.

2. Configure your devices

The **eduroam** Configuration Assistant Tool (CAT) allows you to safely and correctly configure the eduroam wifi with just a few clicks. The program uses a wifi profile provided by the data center to create the configuration on your PC, notebook, smartphone or tablet. Afterwards you can use wifi at all eduroam locations worldwide.

Visit <https://cat.eduroam.org/> in a browser. Then click on the big blue button.

Here you can see a selection of organizations, if the Hochschule für Musik und Theater Hamburg is not displayed directly, use the search function, then select it.

On the following page the actual download for your operating system will be offered. Usually your operating system will be recognized correctly and you can click on the big download button.

Now carry out the installation. During the installation process, you will be asked to enter your HfMT username and password.

Android: To install the eduroam WLAN profile under Android, first the app *eduroam* CAT (e.g. from Google Playstore or F-Droid etc.) must be installed. When logging in to the WLAN for the first time, it may take a few seconds for the connection to be established.

iOS: eduroam will be installed on iOS as a configuration profile. If the user data is not queried directly during the installation of the profile, you can do so under Settings -> General -> Profiles -> eduroam.

MacOS: eduroam will be installed on MacOS as a configuration profile. If the user data is not queried directly during the installation of the profile, you can do so under Settings -> Profiles -> eduroam.

Windows: Perform the installation by executing the file you just saved. If your Windows version for eduroam still requires special drivers, you will be asked for the administrator password.

Wir wünschen Ihnen viel Spaß bei der Arbeit!!!
